ARTICLES

Aaker, David A. **On Methods: A Probabilistic Approach to Industrial Media Selection.** No. 3, pp. 46-54
This disaggregative model takes into account exposure probabilities, segmentation, multiple exposures and journal effects to maximize total effective exposure for a given budget.

Arndt, Johan. **Selective Processes in Word of Mouth.** No. 3, pp. 19-22
Word of mouth communication is not random; it is affected by selective exposure and selective response.

Assael, Henry and George S. Day.
Attitudes and Awareness as Predictors of Market Share No. 4, pp. 3-10
Time series data on attitudes and awareness *do* predict market share—at least for some products.

Axelrod, Joel N. **Attitude Measures That Predict Purchase.** No. 1, pp. 3-17
First brand awareness and a constant sum scale are sensitive and stable predictors of purchase.

Barnett, Norman L. **Developing Effective Advertising for New Products.** No. 4, pp. 13-18
Find out what characteristics consumers desire in a new product which fits your marketing objectives, and then make sure your advertising communicates these characteristics.

Carter, David E. **Newspaper Advertising Readership: Thick vs. Thin Issues.** No. 3, pp. 39-41
Newspaper advertisements get more attention in issues with fewer pages.

Claycamp, H. J. and C. W. McClelland.
On Methods: Estimating Reach and the Magic of K. No. 2, pp. 44-51
Although "Agostini's Constant" is not quite a constant, it simplifies the estimation of reach; procedures are available to calculate the value of K for a given set of data.

Dalrymple, Douglas J.
Estimating Price and Markup Elasticities for Advertised Clothing Products. No. 4, pp. 21-25
Price explained half of the variation in sales. Markup, though not revealed in ads, had a significant negative relationship, but size of ad was not significant.

Day, George S. See Assael and Day.

Ehrenberg, A. S. C. **On Methods: The Factor Analytic Search for Program Types.** No. 1, pp. 55-63
Factor analysis does not reveal TV program types.

Ehrenberg, A. S. C. **The Time and Place for Readership Panels.** No. 2, pp. 19-22
Use readership panels now to provide data for basic research into readership patterns and into measurement techniques.

Ford, Neil M. **Questionnaire Appearance and Response Rates in Mail Surveys.** No. 3, pp. 43-45
The slight improvement in response rate from using a printed, folder-type questionnaire did not justify the extra expense.

Guest, Lester. See Schaps and Guest.

Hartman, Richard C. See Lynch and Hartman.

Harvey, Bill. **Nonresponse in TV Meter Panels.** No. 2, pp. 24-27
This exploratory study seems to confirm that since some homes refuse to join a meter panel, TV meter ratings are biased.

Heads, J. **Ad Sizes and One Ad Recallers.** No. 4, pp. 26-30
Though people who can recall only one newspaper ad are more likely to see large ads, the extra cost of reaching them might not be justified.

Kohan, Xavier. **On Methods: A Physiological Measure of Commercial Effectiveness.** No. 4, pp. 46-48
Peaks in skin resistance occurred when interest in the commercial built up, but did not correlate with verbal reports of interest.

Hartman, Richard C. See Lynch and Hartman.

Harvey, Bill. **Nonresponse in TV Meter Panels.** No. 2, pp. 24-27
This exploratory study seems to confirm that since some homes refuse to join a meter panel, TV meter ratings are biased.

Heads, J. **Ad Sizes and One Ad Recallers.** No. 4, pp. 26-30
Though people who can recall only one newspaper ad are more likely to see large ads, the extra cost of reaching them might not be justified.

Kohan, Xavier. **On Methods: A Physiological Measure of Commercial Effectiveness.** No. 4, pp. 46-48
Peaks in skin resistance occurred when interest in the commercial built up, but did not correlate with verbal reports of interest.

Leavitt, Clark. **Response Structure: A Determinant of Recall.** No. 3, pp. 3-6
Structural analysis of verbatim responses to open-ended questions about TV commercials produced a score which correlated highly with a day-after recall score.

Lynch, Mervin D. and Richard C. Hartman. **Dimensions of Humor in Advertising.** No. 4, pp. 39-45
Joke stimuli and humorous ads reveal five common dimensions of humor: cultivation, nativity, role-playing, capability, and verbal expression.

McClelland, C. W. See Claycamp and McClelland.

Marc, Marcel. **Combining Simulation and Panel Data To Obtain Reach and Frequency.** No. 2, pp. 11-16
Because it takes account of readership patterns revealed by panels, the SCAL media model closely simulates reality.

Nicosia, Francesco M. **Advertising Management, Consumer Behavior, and Simulation.** No. 1, pp. 29-37
Simulation helps to integrate laboratory and survey findings to clarify how consumers make decisions.

Oxenfeldt, Alfred R. **How Housewives Form Price Impressions.** No. 3, pp. 9-17
For food shopping, housewives form impressions of prices charged by individual stores rather than memorize specific prices.

Petroi, John V. **Reaching the Negro Market: A Segregated vs. a General Newspaper.** No. 2, pp. 40-43
For general products use the typical newspaper. For special products the segregated paper is more efficient.

Rawes, E. A. **A Short History of the Advertising Revolution.** No. 4, pp. 36-38
When the well-known conditioning effects of direct questions were at last properly used to influence sales, research suppliers prospered while conventional advertising agencies sank into oblivion.

Robertson, Thomas S. **Purchase Sequence Responses: Innovators vs. Non-Innovators.** No. 1, pp. 47-52
Innovators and non-innovators respond differently at the affective and conative stages in the purchase sequence.

Schaps, Eric and Lester Guest. **Some Pros and Cons of Color TV.** No. 2, pp. 28-39
Color generates greater interest in the commercial and helps to get the message across.

Schreiber, Robert J.
Probability Assignments for the Simulation of Media Reach and Frequency. No. 2, pp. 3-8
Technical problems seem to diminish the promise of reading probabilities for the analysis and selection of media schedules.

Sheth, Jagdish N. **How Adults Learn Brand Preference.** No. 3, pp. 25-36
A panel of foreign nationals reveals the importance of generalization and information in the development of brand loyalty.

Shuchman, Abe. **Are There Laws of Consumer Behavior?** No. 1, pp. 19-27
Perhaps. The author finds two striking candidates in this correlational analysis of MRCA panel data.

Venkatesan, M. **Personality and Persuasibility in Consumer Decision Making.** No. 1, pp. 39-45
No significant relationship was found between self-esteem and persuasibility.

Woodside, Arch G., Jr. **Social Character, Product Use and Advertising Appeals.** No. 4, pp. 31-35
Inner and other-directedness were not related to rates of use of selected products.
